

What's next for *Sudbury*?

To be surrounded by trees and planting

Outdoor seating space overlooking playground

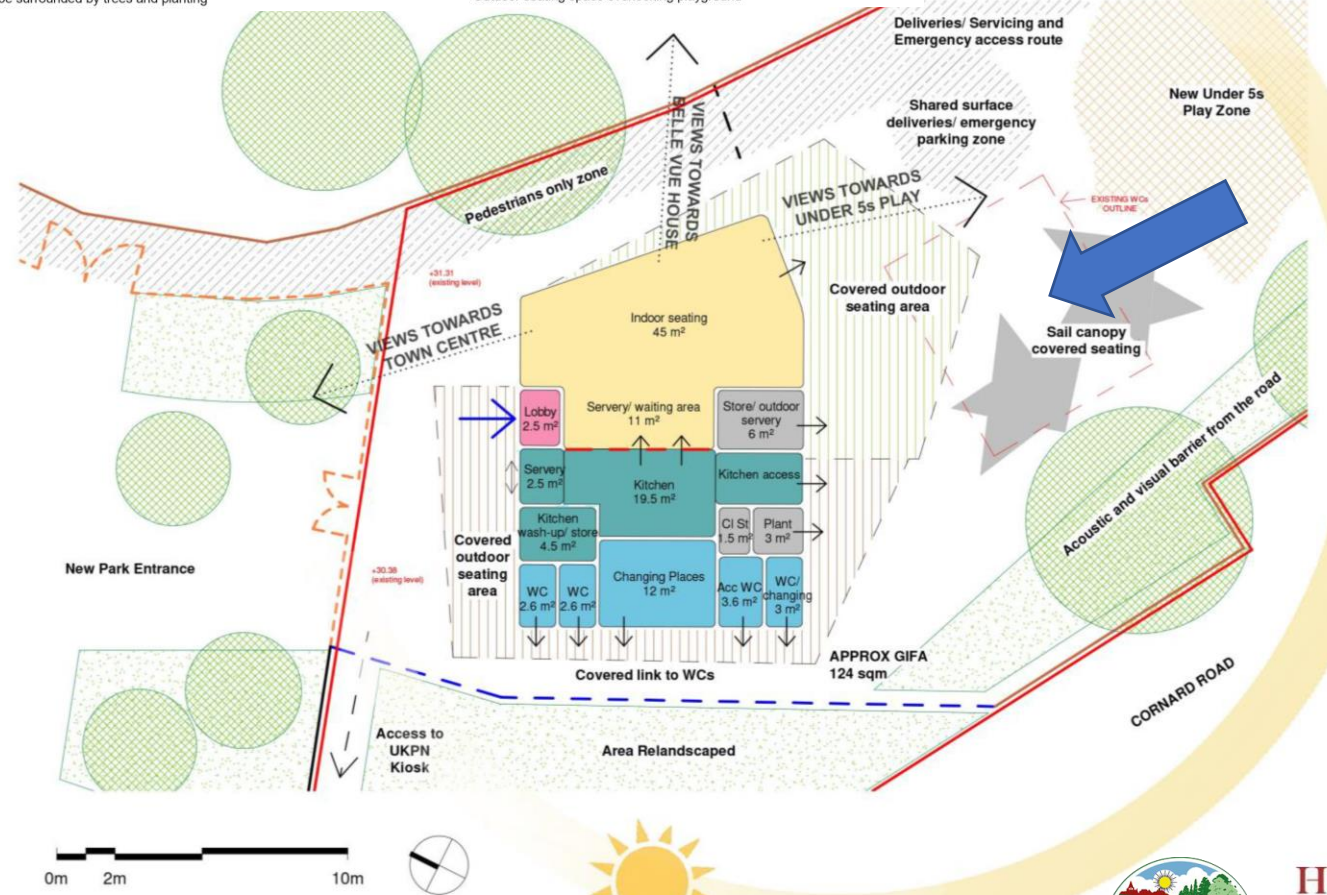

BELLE VUE PARK CAFÉ

Further to the public engagement during October and November 2021, design work on the proposed **new build café at Belle Vue Park** has continued, incorporating feedback from stakeholders.

The Council's appointed Architects, Hamson Barron Smith, are now progressing design towards submission of a planning application by the autumn of 2022.

The detailed work remains underway, so this is not a finalised version, but we are delighted to update you with interim progress and show how feedback responses from the 2021 park engagement have influenced design, including:

- Under 5's play (including sail canopy cover) in close proximity to covered seating and supervision
- Separate access toilets with increased provision
- Location to maximise sun hours and vistas across the park and house
- Accessibility flexibility and security enhancements
- Sustainability and setting the café within the park
